# Looking for a New Doctor?

## Which Doctor is Right for You?

- Have you recently moved to a new city?
- Is your doctor retiring?
- Are you trying to figure out what kind of doctor you need for your general health problems or symptoms you're having?
- Need a bilingual doctor?

Your **primary care doctor** or **primary care physician (PCP)** helps maintain your overall health by focusing on preventive care.

### What type of doctor do you need?

There are many options, but the list below qualifies as PCPs:

- **Family Medicine or General Practice:** General practitioners treat a wide range of medical problems in all ages. Family practitioners are similar to general practitioners, but have extra training to care for all family members, young or old.
- **Internal Medicine:** Internists are doctors for adults. Some internists take additional training to become specialists. For example, a neurologist is an internist who specializes in the diagnosis and treatment of brain, spinal cord, and nervous system diseases, such as multiple sclerosis, Alzheimer's disease, headaches, stroke, or injury.
- **Pediatrics:** Pediatricians specialize in the care of children.
- **Geriatrics:** Geriatricians are trained in family practice or internal medicine and has additional training for older adults.

It's important to choose a doctor that fits your health care needs. If you have a specific health concern, look for a doctor who specializes in that area (e.g. heart disease, women's health issues, lung problems).

### Your primary care doctor coordinates the following care:

- If you need a referral to a specialist
- If you need to be admitted to a hospital

### About PrimeCare
